DRYWALL SYSTEM

A high performance lightweight interior wall system consisting of a GI steel frame, encased in gypsum plasterboards on either side attached with self-drilling drywall screws. The joints are then taped and finished with gypsum jointing compounds.

Drywalls take lesser time, is easier to install and requires less labour as compared to any other conventional methodologies such as brick/block. Drywalls provide excellent sound insulation and superior fire-resistant properties. Among other advantages, Drywalls result in significant structural cost savings, as it is much lighter than conventional brick/block systems. We have developed strong technical capabilities with its centralized design team to support you with cost and performance-optimized drywall solutions for your projects
